5:30 PM-9:00 PM  
Eastern Time

**Generative AI Policy Implications for CISOs and CIOs**

In the rapidly evolving travel and hospitality landscape, implementing Zero-Trust security models presents unique challenges and opportunities

[www.cvvisionintl.com](http://www.cvvisionintl.com)

for industry leaders. This CxO roundtable will explore the delicate balance between robust security measures and the seamless guest experiences that define the hospitality sector.

This roundtable aims to foster a collaborative dialogue on best practices, innovative solutions, and strategic approaches to Zero-Trust adoption in the travel and hospitality industry. Attendees will gain insights into balancing stringent security measures with the high-touch, personalized service that guests expect, while navigating the complexities of a decentralized, cloud-dependent operational model.
