February 19, 2026
Central European Time

Welcome & Registration

12:00 PM-12:50 PM

Opening Remarks

12:50 PM-1:00 PM

**The Autonomous SOC: Securing Production Systems
On-Premise and in the Cloud with SentinelOne AI**

1:00 PM-1:30 PM

The attack surface now spans on-premises infrastructure and AWS cloud environments. This session reveals how

SentinelOne's Singularity Platform provides a unified, autonomous defense across this hybrid landscape. Learn to apply consistent, behavior-based AI protection, detection, and autonomous response (ADR) to endpoints, servers, and ephemeral cloud workloads (EC2/EKS) from a single console. We will show how to eliminate blind spots, ensure compliance, and achieve full one-click rollback capabilities, securing your production systems wherever they reside.

Zero Compromise Data: Overcoming Security Data Growth, Complexity, and Costs with the AI-SIEM

2:20 PM-2:50 PM

Exponential data growth is crippling traditional SIEMs with high complexity and unpredictable costs. This session introduces the AI-SIEM concept via SentinelOne's Singularity Data Lake and XDR Platform on AWS. Learn how a cloud-native architecture separates compute from storage, allowing you to ingest all security data (first- and third-party) into a unified, OCSF-normalized lake with unlimited scalability. We will show how to drastically reduce TCO while enabling lightning-fast queries and real-time threat detection without costly data sampling or tiering.

Networking Break

2:00 PM-2:20 PM

Navigating the AI Frontier: Governing Generative AI Tools in an Enterprise- Compliant Way

1:30 PM-2:00 PM

Generative AI introduces compliance risks like data leakage, IP exposure, and prompt injection. This session provides a practical governance roadmap for secure GenAI adoption using SentinelOne's AI security features alongside AWS services like Amazon Bedrock. Attendees will learn to define and enforce enterprise-compliant usage policies, secure API access, and protect proprietary data used for model training. We will explore how to leverage Purple AI in a controlled manner, ensuring that your organization's GenAI interactions meet strict regulatory and corporate standards.

Executive Networking Lunch

2:50 PM-3:45 PM

Closing Remarks & Networking

3:45 PM-4:30 PM

TOGETHER WITH
