The Forgotten Last Layer of Securing Digital

www.cvisionintl.com

Transformation

In an age of ever-evolving security threats and hybrid work environments, browser security has become a critical pillar in securing the business' most valuable assets and enabling a secure user experience. Join this roundtable to explore cases studies and strategies on:
Closing the browser security gap to improve security posture
Getting ahead of browser-enabled zero-day threats
Navigating and identifying the business impact of browser security adoption

TOGETHER WITH
