### Application Security in a DevOps, Cloud and API World

Security teams are challenged to modernize application security practices in light of accelerating shifts to DevOps delivery models and rapid

adoption of cloud-native application designs. Applications built on microservices (e.g. serverless, containers, APIs) and delivered continuously are outpacing application security teams ability to secure them. CISOs need to consider new skills, new touch points and new platforms to maintain a strong security posture in light of these trends and the speed at which they are re-shaping IT.

## PANELISTS

Chair

**Larry Whiteside**  
Co-Founder &  
President  
Cyversity

Speaker

**Karl Mattson**  
CISO  
Noname Security

Speaker

**Michael Owens**  
BISO  
Equifax

Speaker

**David Levine**  
VP Corporate &  
Information Security,  
CSO  
Ricoh Americas  
Corporation

Speaker

**Matthew Webb**  
Director, Information  
Security  
HCA

Speaker

**Avitosh Pal**  
Senior Director  
Infrastructure/Architecture
