

# AGENDA

The Promising Future of Artificial Intelligence (AI): Opportunities and Challenges Ahead

## CISO Dinner

### SPEAKERS

**Chris Eng**  
Chief Research Officer  
Veracode, Inc.

**Syed Murtaza**  
Director Info Security  
Optum

**Tim Morrison**  
Lead Security  
Governance  
Abertsons

**Matthew Bohne**  
VP, Chief Product  
Security Officer  
Honeywell

**Maksim Belov**  
CTO  
Coherent Solution

**Dan Vanorny**  
CTO  
ImageTrend

**November 30, 2023**

5:30 PM-9:00 PM

Central Time

### The Promising Future of Artificial Intelligence (AI): Opportunities and Challenges Ahead

The potential of Artificial Intelligence (AI) is vast, as it is now being utilized across all industries. With the combination of machine learning, AI has made significant improvements in the field of cybersecurity. Automated security systems, natural language processing, face detection, and automatic threat detection are some examples of how AI is revolutionizing cybersecurity. However, AI is also being used to create intelligent malware and attacks, which can bypass the most up-to-date security protocols, making it a double-edged sword. On the positive side, AI-enabled threat detection systems have the ability to predict new attacks and immediately notify administrators in case of a data breach.
