CISOs know that time does not stand still and need to exhibit adaptability and resilience, especially during times of disruption. Being forced to make extremely fast decisions with high levels of uncertainty requires the latest knowledge within the industry's latest technologies. The CISO Vision Council is a virtual gathering for CISOs to connect with peers and discuss challenges and solutions that will help their organizations to stay ahead of technology innovations, regulations and an ever-changing risk landscape.

# The Greatest Fears?

The biggest fear is not the technology, it is the mistakes made by the people using the technology that could potentially lead to a cyberattack. The majority of CISOs agree that an employee carelessly falling victim to a phishing scam is the most likely cause of a security breach. Most also agree that they will not be able to reduce the level of employee disregard for information security. How do we guard against human error without limiting employee efficiency and productivity?
