PANEL

12:30 PM-2:00 PM

Talent Development & Retention

Hospitals and health agencies are facing the worst staffing shortage in nearly forty years. With burnout leading healthcare workers to quit and coronavirus infections and regulations continuing to sideline a significant share. We will be discussing how to attract and hire the right people, grow within, and build long-term loyalty.

PANEL

2:00 PM-3:15 PM

Improving Healthcare Outcomes- Diagnosis, Data, Patient Centric Care

Accuracy of diagnosis, data quality and patient centric care are the buzzwords around improving healthcare outcomes. Leveraging artificial intelligence with medical procedures to **diagnose disease** early, when there is the highest potential for impact. **Data quality** lives by accuracy, consistency, and relevancy. How can we improve **data quality** by reducing redundancy and decreasing medical errors? **Patient centric care** thrives if the partnership among practitioners, patients, and their families align with patients' wants, needs, and preferences. In this session, we will discuss what's working and what's not working, as we look to improve diagnosis, data quality and patient centric care.
