AI-DRIVEN RESILIENCE: A CISO'S VISION
FOR SECURING DIGITAL TRUST

June 26, 2025

11:30 AM-2:00 PM

Eastern Time

This exclusive luncheon is designed for Chief Information Security Officers (CISOs) and senior cybersecurity leaders who are shaping the future of enterprise security. Join our discussion on how AI-powered strategies can drive cyber resilience—helping organizations proactively identify vulnerabilities, mitigate risk, and build lasting digital trust. Discover visionary approaches that enable CISOs to lead with confidence in an era of accelerating threats and rising stakeholder expectations.

Key takeaways include how AI can proactively identify and prioritize vulnerabilities, practical strategies for integrating AI into risk mitigation frameworks, and ways to build stakeholder trust through transparent, AI-driven security. Attendees will also gain clarity on aligning AI initiatives with long-term business resilience goals.
