Leading with Uncertainty

Three years ago, no one would have predicted the chain of unrelated events that lay ahead. But now after passing through a pandemic that caused the great resignation and then a geopolitical climate that led to a global economic downturn, the technology leadership landscape has

www.cvisionintl.com

changed dramatically.

On the positive side, great challenges spur innovation and efficiencies. Without knowing what obstacles lay ahead in our personal lives or how technology will exactly evolve, can't we look ahead and be ready to lead during times of change?

Join Phil Alfano, Apptio's Field CTO in a discussion around the tools and approaches technology leaders can utilize in planning for the future while reacting to steady change.
