The Flagship of Cybersecurity

# CruiseCon

## SPEAKERS

**Devon Bryan**  
Global CSO  
[Booking Holdings](#)

**Chris Ingles**  
Former US National  
Cybersecurity Director,  
Former Deputy Director  
National Security  
Agency  
[NSA](#)

**Dan Meacham**  
CSO, CISO  
[Legendary Entertainment](#)

**Chris Roberts**  
vASO  
[HillBilly Hit Squad](#)

**Chris Roberts**  
CISO / Field CTO  
[HillBilly Hit Squad](#)

**Devon Bryan**  
Global CSO  
[Booking Holdings](#)

**G Mark Hardy**  
Founder, President  
[National Security Corporation](#)

**Jairo Orea**  
Global Chief Information  
Security Officer  
[Royal Caribbean Group](#)

**Margarita Rivera**  
Global CISO  
[Carnival Corporation](#)

**February 07, 2026**  
Eastern Time

## Welcome & Reception

8:00 AM-9:00 AM

### PANELISTS

  
Jairo Orea  
Global Chief  
Information Security  
Officer  
Royal Caribbean Group

## Welcome Reception and CISO Panel

4:00 PM-5:00 PM

### PANELISTS

Devon Bryan  
Global CSO  
Booking Holdings

Margarita Rivera  
Global CISO  
Carnival Corporation

  
Tim Brown  
Global CISO  
SolarWinds

  
Dan Meacham  
CSO, CISO  
Legendary Entertainment

PANEL

5:00 PM-6:00 PM

## CISO Panel

## Final Remarks

6:00 PM-6:10 PM

February 08, 2026  
Eastern Time

## Nassau, Bahamas Group Excursions

8:00 AM-6:00 PM

**February 09, 2026**

Eastern Time

## After 100 Cybersecurity Assessments, What's Working/What's Not

7:00 AM-7:55 AM

### PANELISTS

 Chris Inglis

Former US National  
Cybersecurity Director,  
Former Deputy Director  
National Security  
Agency  
NSA

## Leadership Lessons From Ground Zero: Commanding the 9/11 Military Support

8:00 AM-8:55 AM

### PANELISTS

 G Mark Hardy

Founder, President  
National Security  
Corporation

## Running a Business in a War, Reuven Aronashvili

9:00 AM-9:55 AM

## Mean Time to Recovery - Human: Measuring What Matters Most

10:00 AM-11:25 AM

In a profession defined by nonstop alerts and relentless pressure, cybersecurity leaders often monitor every system except their own. This interactive session invites CISOs and security executives to step back and measure the one metric most organizations overlook — their human energy system. Drawing on data from the 2025 State of Stress in Cybersecurity report and performance-psychology research, participants will complete a brief “Energy Check-In” to assess their physical, mental, and emotional recovery levels. Through guided reflection and small-group discussion, they’ll learn how to recognize energy depletion before it turns into burnout, and discover practical habits to restore clarity, focus, and resilience. Attendees will leave with a simple framework and worksheet to apply immediately — a quick, repeatable method to monitor and improve their personal and team energy, helping them perform sustainably in a field that rarely powers down.

## Lunch

11:30 AM-1:25 PM

## Career Track

1:30 PM-5:00 PM

To support Mid and Junior level professionals, we're running a career track to support people in a volatile cybersecurity job market. This track is will cover: Degrees and certifications Navigating the workplace Finding your next job Crafting your resume Creating your personal brand Interviewing skills Networking Finding and working with mentors Consulting vs inhouse roles Psychologically dealing with a layoff Hiring authority Q&A There is limited attendance and there is an extra fee of \$149 for attending the session.

## Final Remarks

5:05 PM-5:10 PM

**February 10, 2026**

Eastern Time

## Cozumel

8:00 AM-6:00 PM

**February 11, 2026**

Eastern Time

## Agentic AI: Understanding and Securing the Next Frontier of Intelligent Systems

7:00 AM-7:55 AM

Imagine giving your intern not just access to your computer, but also your credit card, API keys, and permission to make decisions on your behalf! that's essentially what we're doing with agentic AI. Unlike traditional AI that focus on classification predicting outcomes, these systems actively take actions, use tools, and pursue goals with minimal human oversight. This creates complex new attack vectors: agents can be tricked into transferring funds, manipulated through crafted inputs, sent astray by misinformation and hallucinations from another agent in the chain, or develop unexpected behaviors that sidestep our security assumptions. We'll dive into real-world threat scenarios, explore why traditional security models fall short, and discuss practical approaches for containing and governing the next frontier of intelligent systems.

## Standardizing Your Security Culture, Rob Duhart, CISO Oracle

8:00 AM-8:55 AM

## Chris Roberts

9:00 AM-9:55 AM

## PANELISTS

Chris Roberts  
CISO / Field CTO  
HillBilly Hit Squad

## Fostering Trust: How to Build a cybersecurity Brand that inspires Confidence

10:00 AM-11:25 AM

In an era of daily breaches and growing cyber paranoia, building a brand that customers trust is your biggest competitive advantage. This high-impact presentation will reveal the art and science behind creating a cybersecurity brand that stands out in a sea of uncertainty. Learn the secrets to becoming the go-to security leader that your clients rely on, building not just products but long-term confidence and loyalty.

## Lunch

11:30 AM-1:25 PM

Informal lunch groups organized

## Career Track Continued

1:30 PM-5:25 PM

## Closing Reception

5:30 PM-5:45 PM

February 12, 2026  
Eastern Time

## Departure

8:00 AM-6:00 PM

TOGETHER WITH

**PENTERA**
