eliteops

Who We Are

At EliteOps, we are a team of engineers dedicated to delivering expert-driven cybersecurity and observability solutions. Through our partnership with Zscaler, we offer advanced security tools that help businesses streamline and strengthen their security posture. By unifying security, data, and IT infrastructure, we help optimize performance while ensuring robust protection against evolving threats. Our tailored solutions provide actionable insights, enabling proactive threat detection, enhanced system reliability, and continuous operational optimization to meet the dynamic needs of your organization.
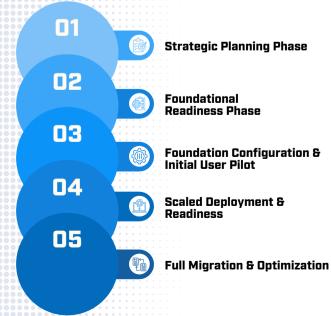

Why Customers Love Us

- **Engineering-Driven Culture:** 96% of our team consists of engineers, with deep expertise in Zscaler API development, automation, and integrations, including 35+ certified Zscaler resources.
- **Deep Zscaler Expertise:** Our team is 100% Zscaler-certified, with former Zscaler employees and technical experts from Accenture.
- **Enhanced Collaboration:** We provide full project lifecycle support, from strategy and architecture to engineering and service desk.
- **Outcomes-Focused:** We offer a 100% outcome guarantee—no outcomes, no fees.
- **Total Accountability:** Simple, predictable fees with the flexibility to cancel anytime.

The Full-Lifecycle Zscaler Experts

At EliteOps, we specialize in Zscaler, delivering expert solutions with precision and automation. Our engineering-driven approach ensures minimal downtime and maximum efficiency, while our innovative SASE architecture and continuous success planning guarantee tailored, optimized results. From strategy to service desk support, we ensure you get the most out of Zscaler.

01 Strategic Planning Phase

02 Foundational Readiness Phase

03 Foundation Configuration & Initial User Pilot

04 Scaled Deployment & Readiness

05 Full Migration & Optimization

EliteOps Deployment Approach

At EliteOps, our deployment process is built on a structured and collaborative approach that ensures successful outcomes at every stage. We begin by defining the strategy and roadmap to align with your organization's goals. Our team then crafts the architecture and tests the plan to ensure scalability and effectiveness. During the execution phase, we implement and configure the solution with precision, followed by fine-tuning and optimization to resolve any ongoing issues. Our hands-on approach, supported by engineering expertise and dedicated support, ensures that every deployment is smooth, efficient, and optimized for long-term success.
